

ESPADA

Switchboard with withdrawable drawers W.W.W.

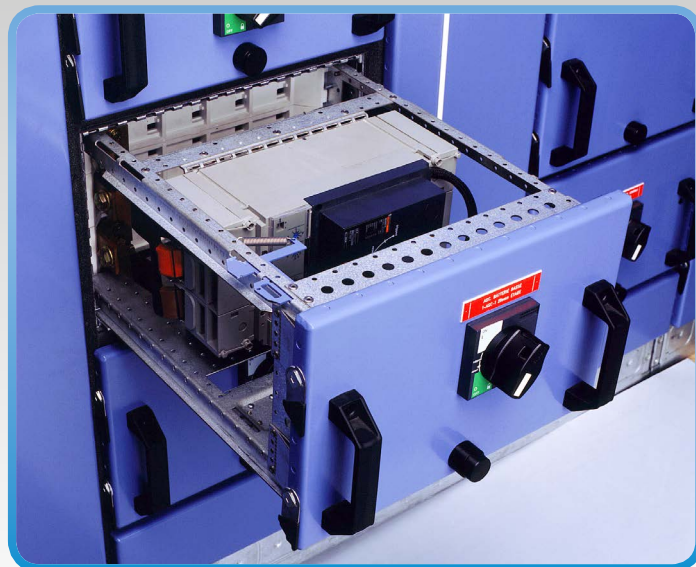

Among **SEA** products the **ESPADA** switchboard does not require power switch-off for component add-on, replacement or maintenance (**connection type W.W.W.**). Optimal security for your installation and users.

- ▶ Main power distribution panels
- ▶ Motors Control Center

Possibility of performing infrared thermography measurements on functional units without power switch-off thanks to "open" position.
